

Springbourne & Boscombe West Neighbourhood Management Area Census Factsheet

This area has been created by aggregating Output Areas (the smallest geography available of around 150 households). It is therefore a "best-fit" match with the neighbourhood management boundaries.

This area has a resident population of 18,406 and an average household size of 1.9, smaller than the Borough figure of 2.1. The area has a smaller under 18 population and a much larger 18-44 year old population than the comparison areas.

Although the non-white population is smaller than for England and Wales as a whole, within the Borough it is one of the more ethnically diverse areas.

Unemployment is higher than the Borough as a whole as well as the other comparison areas.

Owner occupation is lower in this area than in Bournemouth but the area has a large private rental sector. The majority of accommodation is in either purpose built, converted flats or bedsits.

There are fewer households with dependent children than in other areas and a significant proportion of households lacking or sharing facilities. Around 37% of households are without a car which is significantly higher than local and national figures. The percentage of households that are considered to be living in overcrowded conditions is three times that of England and Wales.

There are more people employed in hotels and catering than in the Borough as a whole and more people employed in financial intermediation than in England and Wales.

Explanatory Notes

Age Structure

These factsheets use the Key Statistics produced by ONS which do not include an age and gender split therefore retirement age is assumed to be 65 for males and females

Ethnicity

Statistics in the England and Wales column refer to England only

Economic Activity

Refers to population aged 16-74

For the Census; part-time is defined as working 30 hours or less a week. Full-time is defined as working 31 or more hours a week.

Accommodation Type

In commercial building' includes in an office building; or hotel; or over a shop.

Household Characteristics

The statistics on car ownership include any company car or van when available for private use.

Overcrowded households are those defined as having 1 or more rooms too few.

A dependent child is a person in a household aged 0 - 15 (whether or not in a family) or a person aged 16 - 18 who is a full-time student and in a family with parent(s).

Occupational Characteristics

Refers to the population aged 16-74

Employment Categories

Refers to the population aged 16-74

Other includes; other community; social and personal service activities; private households with employed persons and extra-territorial organisations and bodies.

Qualifications

Refers to the population aged 16-74

Please note these factsheets will be updated with more detailed information as ONS release further census statistics.
